Professional Summary

Software Engineer specializing in distributed systems, high-performance services, cloud architectures, and AI workflows. Experienced in designing backend standards, building business products, optimizing services, and developing orchestrated multi-agent systems. Strong collaborator across technical and business teams, with high ownership and a focus on reliable, maintainable solutions.

Work Experience

- BACKEND SOFTWARE ENGINEER - FEVER**July 2025 - Present | Madrid
- Reduced Redis cache calls by ~50%, improving service efficiency.
 - Established a company standard for cursor-paginated endpoints instead of offset pagination.
 - Developed a cashless payments product and related business capabilities.
 - Designed and developed a new B2B product branch for partner use.
 - Worked with partners, product managers, and multiple departments to align solutions with business requirements.
- CYBERSECURITY INTERN - KDPOF**March 2025 - June 2025 | Madrid
- Optimized an XDR system built on Wazuh, improving detection accuracy.
 - Implemented TLS 1.3 mutual authentication with OpenSSL to meet data privacy requirements.
 - Developed a biometric data collection platform with secure communication protocols.
- VR PROGRAMMER AND DEVELOPER INTERN - C.A.R (CSIC)**June 2024 - August 2024 | Madrid
- Rebuilt over 90% of the virtual environment for an experimental VR project.
 - Reached intermediate Unity proficiency in two weeks despite no prior experience.

Skills

- BACKEND & SYSTEMS:** Python, Java, C, TypeScript, Distributed Systems, REST, Microservices
DATABASES: PostgreSQL, MongoDB, ACID, Query Optimization
DEVOPS: Docker, Kubernetes, Git, ArgoCD, Jenkins, CI/CD
MESSAGING: Kafka, RabbitMQ
PATTERNS & ARCHITECTURES: DDD, CQRS, TDD, SOLID, Hexagonal, Event-Driven
SECURITY: TLS 1.3, PKI, Cryptography (AES/RSA), Wireshark, Nmap, Secure Architecture
MONITORING: Datadog, Sentry
AI & AUTOMATION: LLM workflows, llama.cpp, Multi-Agent Systems, LangGraph, Concurrency, Optimization

Projects

- 2026** - Built an orchestrated AI system with llama.cpp, multiple concurrent agents, and LangGraph workflows.
- 2025 (Personal)** - Developed a portable magnetotherapy device capable of generating controlled magnetic fields for tendinitis treatment.
- 2024 (Academic)** - Built a fully pipelined RISC-V CPU supporting ALU operations, memory access, and control flow. Implemented hazard detection and forwarding, validated in simulation environments.
- 2024 (Academic)** - Designed and coded a concurrent HTTP/1.1 server with request parsing, routing, and process synchronization in low-level C. Benchmarked with up to 1,000 parallel requests.
- 2023 (Academic)** - Developed a real-time online chess platform with private rooms and matchmaking. Django and WebSockets backend, Vue.js frontend.

Education

- Universidad Autónoma de Madrid - Madrid**July 2025
- Bachelor's degree in Computer Engineering
- GPA: 3.2/4. Achieved 3 honors distinctions. Focused on systems architecture, distributed systems, and cybersecurity.
